Subject Contribution to "Polish Project" - Machine Tool Category

1. Available information suggests that Poland will seek to buy machine tools from the west in the milling and grinding tool sector. However it is very difficult to identify the exact type and size that Poland will want... chances favor that at present Poland will want mostly the smaller machines which will be on II-III.

2. As a preliminary estimate the following items seem worthy of further investigation from the point of view of the needs of Polish civil economy.

<u>Item No.</u>	<u>Short Definition</u>	<u>Comment</u>
1088	Gear making machinery	Recent purchases \$87,000
✓ 1022	Lap radial grinders	Recent purch. \$321,000
2050	Spindle bed type auto milling machines	Recent purch. \$11,000
1091	Profiling and duplicating machinery	Purchases seem likely.
2074	Forging machines	"

3. In addition smaller purchases may take place of the following items: 1002, 1021, 1037, 1072 and of 2002.
